DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Reynoso et al. (6710587). Reynoso et al. discloses the same invention as claimed: A hybrid device comprising: a sensor having a permanent magnet 33 adjacent to a permeable pole piece 27 and a sensor coil 23, 25 coupled to the pole piece providing a sensor output; a target (neutral side 17 and hot side 19) for interacting with the sensor; an excitation means (AC 13) for energizing the sensor coil; and an output signal detector (49, etc.) connected to the excitation means See Fig. 2. Although specific columns, figures, reference numerals, lines of the reference(s), etc. have been referred to, Applicant should consider the entire applied prior art reference(s).

Allowable Subject Matter

Claims 2-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2862

Claims 12-23 are allowed.
